Portable power stations have become increasingly popular as people search for reliable power sources for their outdoor adventures or as backups during power outages. These devices are essentially portable batteries that can power different appliances, electronics, and devices. They have become more advanced and can power larger appliances and electronics, making them a must-have for outdoor enthusiasts or homeowners. We have rounded up the top 5 portable power stations of 2021 to help you choose the best one for your specific needs.

1. Jackery Explorer 1000 The Jackery Explorer 1000 is a powerful portable power station with a capacity of 1000Wh. It can power multiple appliances and electronics at once and has a wide range of outputs, including USB-A ports, USB-C ports, DC outputs, and AC outlets. The device comes with an LCD screen that displays the remaining power, making it easy to monitor battery life. Despite its powerful capacity, the Jackery Explorer 1000 is relatively lightweight at 22 pounds, making it easy to move around.
2. Goal Zero Yeti 500X The Goal Zero Yeti 500X is a smaller portable power station with a capacity of 505Wh. It has a compact design, making it easy to carry around. Despite its small size, the Goal Zero Yeti 500X is capable of charging large appliances, such as refrigerators and TVs. It has a range of outputs, including USB-A ports, USB-C ports, DC outputs, and AC outlets. The device is also equipped with an LCD screen that displays the remaining power and charging status.
3. EcoFlow Delta 1300 The EcoFlow Delta 1300 is a highly rated portable power station with a capacity of 1260Wh. It has a sleek design and can power large appliances, making it perfect for camping trips or power outages. The EcoFlow Delta has a range of outputs, including USB-A ports, USB-C ports, DC outputs, and AC outlets. It also features a fast charging time, allowing it to fully charge in about 2 hours.
4. Anker Powerhouse II 400 The Anker Powerhouse II 400 is a compact portable power station with a capacity of 388Wh. It can power several electronics and appliances, making it perfect for outdoor adventures or as a backup power source. The device has a range of outputs, including USB-A ports, USB-C ports, DC outputs, and AC outlets. Despite its small size, the Anker Powerhouse II 400 is capable of charging large electronics such as laptops and TVs.
5. Suaoki G500 The Suaoki G500 portable power station has a capacity of 500Wh and is suitable for use in off-grid situations. It has a range of outputs, including USB-A ports, USB-C ports, DC outputs, and AC outlets. The Suaoki G500 is equipped with a high-capacity lithium-ion battery that is capable of powering appliances such as mini fridges and CPAP machines. It also features an LCD screen that displays the remaining power, making it easy to monitor battery life.

Overall, portable power stations have become a convenient and reliable power source for outdoor enthusiasts and homeowners. The above-listed devices are some of the best portable power stations of 2021 and offer a range of features and capacities to suit different needs. Whether you are planning a camping trip or need a backup power source for your home, a portable power station is a must-have device for anyone seeking reliable power.
