

**Portable power stations** have become an essential tool for those who love to travel or enjoy the great outdoors. They offer a reliable and convenient source of power for electronic devices like smartphones, laptops, cameras, and lights. Portable power stations work by storing energy from a power source like solar panels or wall outlets, and then outputting it through USB ports or AC outlets when you need it. With so many portable power stations available on the market today, it can be challenging to find the best one for your needs. So, to help you out, we've compiled a list of top 5 portable power stations of 2021 that you can consider.

### 1. Jackery Explorer 1000

The Jackery Explorer 1000 is one of the most powerful and reliable portable power stations available today. It features a large capacity of 1002Wh, which makes it capable of charging electronic devices several times a day. The Explorer 1000 can be charged via wall outlets, solar panels, or car adapters, which makes it ideal for those who enjoy outdoor activities like camping, RVing, or hiking. The unit has multiple output ports, including USB-A, USB-C, AC, and DC, which makes it perfect for powering laptops, smartphones, and other electronic devices.

### 2. Goal Zero Yeti 500X

The Goal Zero Yeti 500X is a portable power station designed for use in the great outdoors. It features a 505Wh lithium-ion battery that can store enough energy to charge a smartphone up to 50 times or power a laptop for up to 10 hours. The Yeti 500X can be charged via wall outlets, solar panels, or car adapters. It also features multiple output ports including USB, AC, and 12V, which makes it perfect for powering your electronic devices on the go.

### 3. EcoFlow River Max

If you're looking for a powerful and reliable portable power station, then the EcoFlow River Max is your solution. It comes with a 576Wh battery that can power electronic devices for hours. The unit is splash-proof, dustproof, and shockproof, making it durable and reliable for outdoor activities. The EcoFlow River Max is equipped with multiple output ports, including AC, DC, and USB-A and USB-C, which makes it perfect for powering a variety of electronic devices.

### 4. Suaoki G500

The Suaoki G500 is a 500Wh portable power station that has a robust battery life. It can charge electronic devices up to 7 times and power a mini-fridge for up to 14 hours. The drawback of this unit is that it takes a while for it to charge up fully. However, once it's fully charged, it can be relied upon to power your electronic devices with its multiple output ports, including AC, DC, and USB.

### 5. Rockpals 500W

The Rockpals 500W is a 500Wh portable power station that comes equipped with a 300-watt pure sine wave inverter, which ensures that your electronic devices are powered up smoothly and safely. The unit is equipped with multiple output ports, including 2 AC outlets, 4 USB ports, a USB-C port, and a 12V/10A carport. The Rockpals 500W is ideal for powering small appliances like fans and mini-refrigerators. It can be charged via wall outlets, solar panels, or car adapters.

## Conclusion

**Portable power stations** are essential tools for outdoor enthusiasts and travelers. They provide a reliable and convenient source of power for electronic devices on the go. The top 5 [portable power stations](#) of 2021 listed in this article are all excellent options for powering your electronic devices anywhere. They come equipped with various output ports, have different battery capacities, and offer reliable and efficient performance. So, consider your needs and choose the best one that suits you.
